★ DEFINING EXCELLENCE ★

August 21, 2017

To Whom It May Concern:

In January 2017, at our annual team retreat, we engaged Reg Noel to lead our team through an incredible experience of making a beautiful piece of art. The result was far more than we expected.

With Reg's guidance, our team worked together to bend and shape materials and assemble a raw piece that was the beginnings of a piece of art. Even at that point, we could all see ourselves and our team in what was created. Although it was early in the process, we felt it would tell our story.

Reg took the piece and completed it, adding his remarkable artistry to it. When he presented it to us to hang in our office, we were moved to tears. In addition to the breathtaking work, which exceeded our expectations, Reg included a storyboard to hang with the piece that included a photo that he took of our team at work, and a beautiful paragraph that he wrote which detailed his observations about our company and our team that are reflected in the piece.

Throughout our work together, Reg was personable, warm and wonderful. He engaged with our team, encouraged our team members, and seamlessly felt like one of us while he led us through this process. We had so much fun, and we learned so much, from him and from this experience.

We would highly recommend Reg and this experience for any group looking for a unique and engaging artistic experience. For groups as diverse as fellow travelers to fellow colleagues, and for reasons ranging from commemorating an occasion or event to creating a piece for a fundraiser, this experience would be well-suited to them all. And with his wonderful combination of charm, warmth, coaching and encouragement, Reg will create an experience that your group will never forget.

Sincerely,

Melanie Colpitts
