

September 6, 2017

To whom it may concern,

In early 2017, Reg Noel was invited to participate in CRA's annual company day by leading us through a collective art project. Prior to meeting Reg, I had noticed various art projects in offices throughout Moncton, and was impressed with the beautiful, abstract nature of the art. When Reg contacted me about doing a project with CRA, it was an easy decision to participate.

Reg led us through the process of individually bending metal pieces and placing them in the art piece. The activity included all staff members (even engaging the less social among us) and was highly entertaining. This activity was a way of connecting with our co-workers, while also having a laugh. Particularly memorable was including a paw print of Rosie, our company dog, in the finished piece.

Once all the pieces were in place, Reg took the art and added his magic touch, completing it with beautiful colors and photos from the day. The finished piece is impressive and an eye-catching addition to our office.

Reg was engaging, personable, and entertaining, and I highly recommend Reg and this wonderful activity. It was a pleasure to work with him from start to finish. The CRA team is thrilled with the art we helped to create, and are proud to hang it in our office.

Sincerely,

Christina Waddy  
Director, Corporate Research Associates
